

IXI-UMS Exchange 2003 Connector

Unified Messaging

for Exchange Server 2003 and Exchange 2000 Server

- Fax
- Voice
- SMS
- Mobile/Remote Enquiry
- Mobile Notification
- Client Tools for Office Package with fax printer driver, Outlook Add-In (Microsoft Windows Terminal Server and CITRIX MetaFrame/Presentation Server compatible)

Preconditions

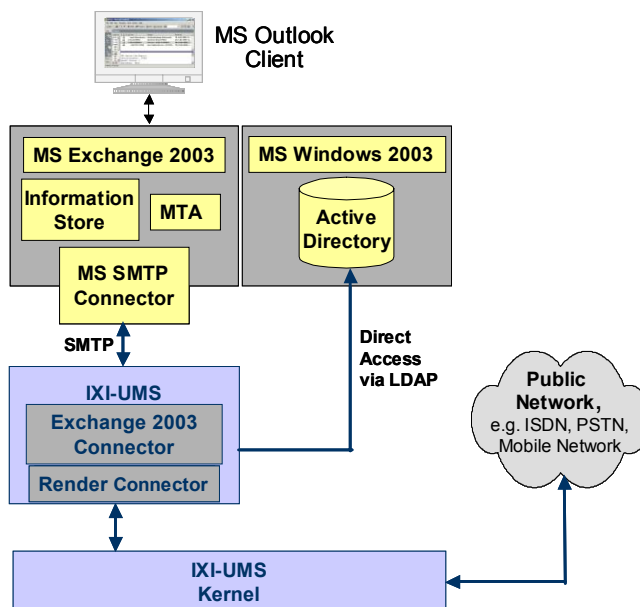

- Windows 2003 Server, Windows XP Prof
- Internet Explorer 5.0 or higher
- IXI-UMS Kernel 5 or higher with installed IXI-Framework
- Exchange Server 2003 or Exchange 2000 Server Service Pack 2

Installation / Administration

- Installation as Windows Service
- VMware compatible (GSX Server, ESX Server)
- Connector-administration under MMC
- User Maintenance directly in Active Directory
- Installation with or without AD schema-extension
- Single Store: direct access to Active Directory and Information Store (no data replication necessary)
- IXI-UMS client installation not necessary (Outlook as client)
- Use of the global and personal address books
- IXI-UMS Kernel and IXI-UMS Connector can be installed on one PC or on separate PC's
- Support of distributed messaging architectures with several Exchange Servers
- Least Cost Routing via distributed servers
- Combination with further IXI-UMS Connectors possible (e.g. for SAP systems, Microsoft Dynamics NAV (Navision))

UMS Connection to PBX

The unified messaging solution works with conventional PBX's as well as with IP-based PBX's (e.g. CallManager, innovaphone PBX).

Further Possibilities

- IXI-Call connection (CTI with Contact Popup with incoming calls, easy dialing, status monitor, MetaDirectory)
